ONE CONTACT FOR ENDLESS POSSIBILITIES

FOLLOWING THE RECENT ANNOUNCEMENT FROM THE U.K. GOVERNMENT THAT ENGLAND WILL ENTER A NEW NATIONAL LOCKDOWN FROM THURSDAY 5TH NOVEMBER WE WANTED TO LET EVERYONE KNOW THAT KEEPME LIFESTYLE WILL REMAIN OPEN DURING THIS TIME. PLEASE BE ASSURED THAT KEEPME ARE COMMITTED TO CONTINUING TO SUPPORT OUR CUSTOMERS THROUGHOUT THIS PERIOD.

advent calendars

We all love when it comes to that time of year to open the first day of your Advent Calendar and enjoy a little treat each morning until Christmas Day. With the year we have all had, counting down to the end of 2020 is extremely bittersweet.

Over the years Advent Calendars have greatly diversified, whether it's a beauty calendar, luxury beverage, candles, etc, there really is an option for everyone. At KeepMe we pride ourselves on working with the brand that really innovated the beauty Advent Calendar back in 2012.

christmas gifting

KeepMe understand the importance of standing out in the Holiday Gifting season. We find joy in bringing our customers Holiday Spirit to life! With our extensive knowledge in packaging, KeepMe have your luxury, standard and eco-friendly dreams covered.

Whether you need just a standard tuck box, luxury velvet humidor or bauble shaped trinket, leave the production up to us and we will make your Holiday gifting dreams come true!

why you should always wear spf even in
WINTER

With the temperatures beginning to dip and the sun setting earlier each day, your first impulse may be to put your SPF away for another year. But as any dermatologist will tell you, protecting skin against UV damage is a year-round commitment.

The freezing temperatures and vicious winds that leave your skin dry and agitated allow for UV rays to have a better shot at your skin. Wearing sunscreen on exposed skin, especially when the sun's rays are strongest between **10am and 4 pm**, will keep you protected from these damaging rays.

Sun cream has useful anti-aging properties and with the ozone layer being thinner in winter UV rays can cause more damage than in summer months. This means you are still at risk of skin cancer. So, make sure to keep up a good skincare routine and make sure you top up your SPF throughout the day!

note from the kml team

Our lovely team member **Jodie** is off on maternity leave this month. We wish you all the best for your new adventure as a Mum and can't wait to meet your wonderful baby boy!

Any orders that need to be dispatched before Chinese New Year should be in by **end of October**.
