ONE CONTACT FOR ENDLESS POSSIBILITIES

may the forest be with you

We created LUXECO because we believe our sustainable values should shine through in our product offering, so behold we have created these great for the planet, 100% recyclable paper bags with a water based seal, cotton rope handles and made with FSC paper, once you've seen the quality you'll be reusing it rather than recycling it anyway!

LUXECO bags not only recycle material that would be going to waste, they also eliminate the need for single-use plastic bags that have proven to harm the environment. The effects of plastic on the environment can be devastating. Plastic products such as plastic bags can take between 15 and 1,000 years to break down, and that's assuming they even make it into a landfill instead of ending up in streams, rivers or the ocean!

keep calm and
RECYCLE!

Keep Me aim to reduce our carbon footprint by reusing any void fill packaging we receive, even from our home deliveries! (All the paper fill in those Amazon boxes really mounts up).

The topic of conversation in house has been, how we can reduce our plastic intake at home as well as in the office. We came up with the following ideas:

- Embrace reusable containers
- Carry a set of reusables in your bag
Switch from liquids to solid products (bar soap, solid shampoo, moisturiser bars)
- Switch from laundry liquid to powder
- Line-dry rather than tumble-dry
- Avoid using cosmetics that use micro-plastics, buy a biodegradable brush and wear natural fabrics
- Freeze Your Leftovers

We'd love to hear your ways to reduce waste at home!

note from the kml team

We will be exhibiting at Cosmetics Business Live Online this year!

Don't forget we have 2 Bank holidays in May Monday, 3 May 2021 & Monday, 31 May 2021

why not give us a follow...
